Is the system similar to linkedIn?

Do we need to provide admin dashboard?

SCOPE OF WORK FOR PYTHON DEVELOPERS

Content Management System:

1. Post Creation: Develop a feature for users to create new posts that includes a title, body text, and an optional featured image. CRUD

2. Post Management: Create a system for users to manage their posts, including the ability to edit, delete, and publish/unpublish posts. CRUD

3. Categories and Tags: Implement a system for users to categorize their posts and add tags to make them easily searchable. *What kind of categories?*

4. Comments: Develop a feature for readers to add comments on posts. Include options for the author to moderate and approve comments before they are published. *How? Via notification*

5. Media Library: Create a media library for users to upload and manage images, videos, and other media files.

6. Revision History: Implement a revision history feature that allows users to view and restore previous versions of a post.

7. Featured Posts: Develop a system for users to mark certain posts as featured, which can be displayed prominently on the blog homepage.

8. Search Functionality: Implement a search function that allows users to search for posts based on keywords, categories, tags, and other parameters.

User Management System:

1. Registration: Develop a user registration system that requires users to provide basic information such as their name, email address, and password. CRUD

2. User Profile: Create a user profile page that includes options for users to add a profile picture, bio, and social media links. CRUD

3. User Roles and Permissions: Implement a system for assigning different user roles and permissions, such as author, editor, and administrator. *Who will allot these roles?*

4. Login and Logout: Develop a secure login and logout system that authenticates users and keeps their login sessions active for a specified amount of time.

5. Password Reset: Create a password reset feature that allows users to reset their passwords via email. CRUD
